CREMATORIUM

Extraction of the ash dusts which are produced during the combustion process deposited everywhere

TASK

During the combustion process, a considerable amount of ash and dust is produced, which must be removed to ensure a clean and hygienic working environment.

On several levels in the crematorium, the possibility should be created to, dust from the floor and also from individual units.

SPECIAL FEATURE

- | Extraction system with more than 150 metres of suction line
- | Piping over 3 floors

ADVANTAGES

- | Suction material / ash is collected in a disposal container (barrel with polybag), which is hermetically sealed under the silo.
- | The extraction system is connected to the connected systems via a remote control.

OUR SOLUTION

Industriesauger DA 5150

- | Kw: 15 kW
- | Air: 860 m³/h
- | Pressure: - 310 mbar
- | Filter: 4.5 m²
- | Dust class: H
- | Disposal container: Drum with polybag

WE VACUUM EVERYTHING

1

HANDMADE IN RIEMSLOH

If it says Ruwac,
then there's Ruwac inside.
All of our products for the
European market are produced
in Germany at our Riemsloh site.

2

INDIVIDUAL SOLUTION

We provide demonstrations
and advising on site!
For more than just vacuums.

3

HIGH QUALITY MATERIALS

A Ruwac vacuum delivers
outstanding, long-term extraction.
To make sure this is the case,
we use high-quality components
like GRP housing parts.

4

RESEARCH AND DEVELOPMENT

We are always conducting
research and development
so we can meet any requirement
with the best solutions

5

COMPREHENSIVE SERVICE-CONCEPT

Over 20 qualified service
technicians are available
throughout Germany to
ensure safety and maintenance
for your industrial vacuum.

6

INTEGRATED CONSULTANT

From conception to
commissioning in
compliance with
all standards and regulations.
