COUNTRIES IN EUROPE,
AMERICA AND ASIA

WE VACUUM EVERYTHING

DRINKS FILLING STORAGE

With crown corks or
screw caps

TASK

When bottles are filled with crown corks or screw caps, fine dust is released
fine dusts are released when the caps are fed to the capping unit.

The fine dusts are produced during belt feeding, both by abrasion on the conveyor belts and
at the transfer stations of the conveyor belts.

Conveyor belts as well as at the transfer stations of the conveyor belts.

The particles generated there, which could become detached through mutual contact, must
be removed so that the filling unit and the products are free from

SPECIAL FEATURE / ADVANTAGES

- | The connections are installed at the last transfer points before the filling
- | Short transport distance to the capping process
- | Specially designed suction nozzle at the transfer point
- | The distance between the conveyor belt and the suction nozzle must be determined exactly so that the dust and not the crown corks or similar are captured

OUR SOLUTION

Dust extractor type DS 64400 with pipeline

- | Rol Piping: spiral seam
- | Length: up to approx. 30m to the right and or left
- | Suction connections: 50mm / 60mm
- | Suction connections: 5 to 6 per dust extractor
- | Air flow rate per suction point: approx. 220m³/h - 240m³/h

WE VACUUM EVERYTHING

1

HANDMADE IN RIEMSLOH

If it says Ruwac,
then there's Ruwac inside.
All of our products for the
European market are produced
in Germany at our Riemsloh site.

2

INDIVIDUAL SOLUTION

We provide demonstrations
and advising on site!
For more than just vacuums.

3

HIGH QUALITY MATERIALS

A Ruwac vacuum delivers
outstanding, long-term extraction.
To make sure this is the case,
we use high-quality components
like GRP housing parts.

4

RESEARCH AND DEVELOPMENT

We are always conducting
research and development
so we can meet any requirement
with the best solutions

5

COMPREHENSIVE SERVICE-CONCEPT

Over 20 qualified service
technicians are available
throughout Germany to
ensure safety and maintenance
for your industrial vacuum.

6

INTEGRATED CONSULTANT

From conception to
commissioning in
compliance with
all standards and regulations.
