EVERYTHING**

METALWORKING
Vacuuming dust from
metal processing

TASK

It is unavoidable that dust is generated in many metal processing plants, is unavoidable. What was needed was a powerful, versatile industrial vacuum cleaner, especially for cleaning floors and machines.

The housing of the vacuum cleaner is made of fully electrostatically conductive GRP.

SPECIAL FEATURE

- | An industrial vacuum cleaner for a wide range of applications
- | Extraction of metal dusts from the floor and machines
- | Use of different brushes and nozzles

ADVANTAGES

- | Vacuum cleaner with hose holder and accessory holder, everything right at hand.
- | A dust tray on wheels makes it easy to dispose of the of the collected dust

OUR SOLUTION

**Industrial vacuum, Type R01 R,
Zone 22, for mobile use**

- | KW: 4,0
- | Air: 440 m³/h
- | Pressure: - 213 mbar

WE VACUUM EVERYTHING

1

HANDMADE IN RIEMSLOH

If it says Ruwac,
then there's Ruwac inside.
All of our products for the
European market are produced
in Germany at our Riemsloh site.

2

INDIVIDUAL SOLUTION

We provide demonstrations
and advising on site!
For more than just vacuums.

3

HIGH QUALITY MATERIALS

A Ruwac vacuum delivers
outstanding, long-term extraction.
To make sure this is the case,
we use high-quality components
like GRP housing parts.

4

RESEARCH AND DEVELOPMENT

We are always conducting
research and development
so we can meet any requirement
with the best solutions

5

COMPREHENSIVE SERVICE-CONCEPT

Over 20 qualified service
technicians are available
throughout Germany to
ensure safety and maintenance
for your industrial vacuum.

6

INTEGRATED CONSULTANT

From conception to
commissioning in
compliance with
all standards and regulations.
