VACUUM
EVERYTHING**

VEHICLE PAINT SHOP
Direct suction of
Paint mist

TASK

The vehicle paints used today are free of solvents and many other pollutants. Nevertheless, when applying the paint manually with a spray gun, the painter is (usually) permanently exposed to the paint mist. In addition, the „overspray“ should also not settle on the equipment of the paint shop.

SPECIAL FEATURE

- | Coarser particles are collected in a pre-separator (in a fleece bag). collected
- | Finer particles are retained at the pocket filter
- | Additional safety due to downstream activated carbon module
- | Suction nozzle as funnel

ADVANTAGES

- | Increasing the service life of the filter by using a pre-separator
- | Use in Gasex zones 1, 2 and zone 22
- | Easy replacement of the activated carbon module by means of tension locks on the housing

OUR SOLUTION

Vacuum cleaner Type DS 2520 HL

- | KW: 6,0
- | Air: 650 m³/h
- | Pressure: - 230 mbar
- | Activated carbon module: 2.4m²
- | Pre-separator with fleece bag: 200 litres

WE VACUUM EVERYTHING

1

HANDMADE IN RIEMSLOH

If it says Ruwac,
then there's Ruwac inside.
All of our products for the
European market are produced
in Germany at our Riemsloh site.

2

INDIVIDUAL SOLUTION

We provide demonstrations
and advising on site!
For more than just vacuums.

3

HIGH QUALITY MATERIALS

A Ruwac vacuum delivers
outstanding, long-term extraction.
To make sure this is the case,
we use high-quality components
like GRP housing parts.

4

RESEARCH AND DEVELOPMENT

We are always conducting
research and development
so we can meet any requirement
with the best solutions

5

COMPREHENSIVE SERVICE-CONCEPT

Over 20 qualified service
technicians are available
throughout Germany to
ensure safety and maintenance
for your industrial vacuum.

6

INTEGRATED CONSULTANT

From conception to
commissioning in
compliance with
all standards and regulations.
