COUNTRIES IN EUROPE,
AMERICA AND ASIA

**WE
VACUUM
EVERYTHING**

DIRECT EXTRACTION IN THE PRINT SHOP

**Absorbing the finest
Paper dust and shreds**

TASK

During the numerous printing, transport, cutting and folding processes - especially in multi-storey printing plants - generate large quantities of paper dust.

So do quantities of paper strips and waste.

They have to be removed from the printing process because they would impair the print quality.

SPECIAL FEATURE

- | Integration of the suction cups directly into the production process on each level of the printing units
- | Multi-storey printing plants
- | Continuous suction

ADVANTAGES

- | The vacuumed material is strongly compressed in a filter bag of dust class M
- | Optimum utilisation of the filter
- | Easy filter change
- | Dust explosion-proof industrial vacuum cleaner
- | Capacity of the customer's container: approx. 500 litres

OUR SOLUTION

Industrial vacuum cleaner Type DAV-SB

- | KW: 2,2 / 3,0
- | Air: 285 / 355 m³/h
- | Pressure: - 210 / -240 mbar
- | Capacity: 130 litres

WE VACUUM EVERYTHING

1

HANDMADE IN RIEMSLOH

If it says Ruwac,
then there's Ruwac inside.
All of our products for the
European market are produced
in Germany at our Riemsloh site.

2

INDIVIDUAL SOLUTION

We provide demonstrations
and advising on site!
For more than just vacuums.

3

HIGH QUALITY MATERIALS

A Ruwac vacuum delivers
outstanding, long-term extraction.
To make sure this is the case,
we use high-quality components
like GRP housing parts.

4

RESEARCH AND DEVELOPMENT

We are always conducting
research and development
so we can meet any requirement
with the best solutions

5

COMPREHENSIVE SERVICE-CONCEPT

Over 20 qualified service
technicians are available
throughout Germany to
ensure safety and maintenance
for your industrial vacuum.

6

INTEGRATED CONSULTANT

From conception to
commissioning in
compliance with
all standards and regulations.
