VACUUM
EVERYTHING**

POWDER COATING

**Finest powder coating
dusts in large quantities
absorb**

TASK

Every powder coating system has a large, integrated room extraction system. Here, the room air and excess powder is extracted, filtered, separated and collected from the powder coating booth.

The collection container must be emptied regularly. Until now, this has always been done with great „dusty“ effort using a shovel.

SPECIAL FEATURE

- | Customised suction unit mounted on the stand frame
- | Chassis, elevated position of the filter unit
- | High-volume collection container
- | Big bags hold 400kg of residual powder

ADVANTAGES

- | DustEx zone 22
- | Easy vacuuming of the powder chamber
- | Reuse of the big bags
- | Easy exchange of the big bags with lift truck

OUR SOLUTION

Industrial vacuum cleaner with 2.6m² bag filter and BigBag emptying

- | kW: 4,0
- | Air: 440 m³/h
- | Pressure: -213 mbar

WE VACUUM EVERYTHING

1

HANDMADE IN RIEMSLOH

If it says Ruwac,
then there's Ruwac inside.
All of our products for the
European market are produced
in Germany at our Riemsloh site.

2

INDIVIDUAL SOLUTION

We provide demonstrations
and advising on site!
For more than just vacuums.

3

HIGH QUALITY MATERIALS

A Ruwac vacuum delivers
outstanding, long-term extraction.
To make sure this is the case,
we use high-quality components
like GRP housing parts.

4

RESEARCH AND DEVELOPMENT

We are always conducting
research and development
so we can meet any requirement
with the best solutions

5

COMPREHENSIVE SERVICE-CONCEPT

Over 20 qualified service
technicians are available
throughout Germany to
ensure safety and maintenance
for your industrial vacuum.

6

INTEGRATED CONSULTANT

From conception to
commissioning in
compliance with
all standards and regulations.
